SUMMARY

Frontend lead with 6+ years building production web platforms in React, Next.js and TypeScript, plus full-stack delivery in Node.js, NestJS and SQL databases. Sole frontend owner of an enterprise ITSM platform for BRAC, including a key API call made 26× faster. Leads a 3-person team, mentors junior developers, and ships with automated testing, CI/CD and AI-assisted workflows. IEEE-published in ML-based image detection.

SKILLS

Frontend	React, Next.js (App Router), TypeScript, JavaScript, Redux Toolkit, Zustand, TanStack Query, React Hook Form, Zod, Tailwind CSS, shadcn/ui, MUI, Ant Design, Vite
Backend	Node.js, NestJS, Express.js, REST APIs, Sequelize, PostgreSQL, MySQL, SQL Server, Redis, BullMQ, Socket.IO
Auth & Security	JWT, OAuth / SSO (Microsoft, Google), Keycloak, RBAC, CSP, XSS prevention
Testing & Tooling	Jest, React Testing Library, CI/CD, Git, Swagger, Meilisearch, Cloudflare R2
Practices	Component architecture, performance optimization, i18n, code review, AI-assisted development (Claude Code)

PROFESSIONAL EXPERIENCE

APSIS SOLUTIONS LTD. **Jun 2022 – Present**
Software Engineer (Frontend Lead) *Dhaka, Bangladesh*

- Lead a 3-person frontend team and mentor 2 junior developers through code reviews and pairing.
- Own frontend architecture: state management, folder structure, shared component library and coding standards.
- Maintain CI/CD pipelines for automated frontend builds and deployments.

WINGS ITSM — IT service management platform for BRAC | Next.js, React, TypeScript, TanStack Query, Redux

- Sole frontend engineer, delivering the full UI for ~100 BRAC staff handling 20–30 tickets a day.
- Cut the Ticket Details page's main API call from 2.66 s to ~100 ms (~26× faster) and requests per page from ~16 to 7.
- Cached a 12.5 MB location dataset in IndexedDB with a 24-hour expiry and loaded it only for users who can edit.
- Migrated data fetching to TanStack Query, removing duplicate requests, race conditions and stale SLA data.
- Shrank the initial bundle with route-level code splitting across 6 pages and on-demand icon chunks.
- Fixed security audit findings with CSP and clickjacking headers, upload validation and DOMPurify sanitization.
- Wrote 39 Jest and React Testing Library tests covering upload rules, the HTML sanitizer and the upload component.
- Built a dynamic form engine with cascading fields and business-hours-aware SLA tracking with breach detection.

CMS & Sales Management Platform — vendor and subcontractor onboarding portal | React 19, TypeScript, Node.js, Express, Sequelize, SQL Server

- Built a full-stack onboarding portal that replaced a manual vendor registration and approval process.
- Built multi-step application forms with React Hook Form and Zod / Yup validation.
- Implemented configurable multi-level approvals with delegation, approver comments and a full audit trail.
- Designed RBAC with menu-level permissions, JWT-secured APIs and Microsoft / Google single sign-on.
- Built a weighted subcontractor safety scorecard and cron-driven expiry reminders by email.

- Modelled 30+ entities with Sequelize migrations and documented the REST API with Swagger.

Avenir — machine survey and approval platform for BAT Bangladesh | React, Redux *Mar 2023 – Apr 2023*

- Built 15+ survey forms for Maker and Packer machines, 5 generated dynamically from API-driven schemas.
- Implemented a 3-level approval workflow with email alerts, plus dashboards with Excel reporting.

Vehicle Registration System — Runner Group

- Built role-based vehicle registration with multi-level approvals, bill posting logs and summary reports.

genofax.com — Next.js migration and UI rebuild | Next.js 15, React, TypeScript, next-intl

- Migrated the site from Next.js 12 Pages Router to Next.js 15 App Router, including 3-language i18n.
- Rebuilt the UI on a modular, feature-based architecture with reusable components.

VISERX **May 2021 – May 2022**

Software Engineer *Dhaka, Bangladesh*

- Built an inventory management system and e-commerce platform with Laravel, React and Redux.
- Developed a stock brokerage web app for Tasia Securities with React and Laravel.

FLYTE SOLUTIONS **Mar 2020 – Apr 2021**

Junior Software Developer *Dhaka, Bangladesh*

- Built reusable server-side modules integrated with frontend features.
- Diagnosed and fixed performance bottlenecks to improve application speed and reliability.

PROJECTS

MULTI-TENANT WAREHOUSE & CMS SAAS **Ongoing**

Personal commercial project | NestJS, PostgreSQL, Redis, BullMQ, Socket.IO

- Architected a NestJS modular monolith with schema-per-tenant PostgreSQL and a typed repository layer.
- Implemented a 6-role permission hierarchy, tested with 2 tenants.
- Added BullMQ background jobs, Socket.IO real-time updates, Meilisearch search and R2 storage.

EDUCATION

BSc in Computer Science and Engineering

East West University, Dhaka, Bangladesh

PUBLICATION

Automated Detection of Plant Diseases Using Image Processing and Faster R-CNN Algorithm **2019**

Trained a Faster R-CNN model with the TensorFlow Object Detection API to detect plant diseases from leaf images.

2019 International Conference on Sustainable Technologies for Industry 4.0 (STI), IEEE |
